Secretary  
FCC  
445 12th St. SW  
Washington DC 20554

Subject: Docket 99-25  
FCC MAIL ROOM

I support FCC proposals to create three new classes of low power FM radio stations; 1000 Watts, 100 watts and one to ten watts.

Those companies and organizations that currently hold commercial and non commercial AM And FM radio licenses should be forbidden from owning or applying for these low power licenses.

There should be a limit of no more than five licenses of low power radio FM licenses to be held by any one group and no more than one in any community.

Sincerely,

*Carl Kakasuleff*
